** If more than one account #, provide break down

Sole Source Justification: Caldwell Engineering

The City of Vineland Electric Utility will be seeking Equipment Repair Services for Danfoss PAHT positive displacement demineralized water pumps. These pumps are specialized in nature and patented by Danfoss. The calibrated output of these pumps allows the Siemens FT 125 system to precisely control demineralized water flow using VFD's. The pump set that was recently replaced at HMD Unit #11 needs to be sent out for repair as VMEU does not possess any spares at this time. Siemens requires these unique pumps for operation of the Trent 60 WLE gas turbine. They play a crucial role in temperature control, NOx emissions reduction, and maximizing MW output. It is critical to have spare Danfoss pumps onsite in order to ensure reliable generation.

Caldwell Engineering Pumps Division is the only company certified to repair Danfoss PAHT pumps. The acceptance of another repair facility or brand of pump will adversely affect the operation of the Vineland Municipal Electric Utility.
