Electronic Funds Transfer Policy and Procedures

Revised: April 12, 2019

Policy

The primary goal of this policy is to ensure Electronic Funds Transfers (EFTs) are initiated, executed, and approved in a secure manner. This policy establishes requirements with respect to domestic and international payments via EFT for payments of the City of Vineland's obligations to vendors.

Definitions:

Automated Clearing House (ACH): Generally refers to payments made via direct deposit and should be set up in the vendor master that denotes this payment method.

Bank Acronyms:

- ABA - American Banking Association
- BIC - Business Identifier Code
- IBAN - International Business Account Number
- IRC - International Routing Codes
- SWIFT - Society of Worldwide Interbank Financial Telecommunications

Banking information: Information from the payee or their bank regarding their account; including bank name, account name, account number, routing number, bank contact information and any other information necessary to transmit funds.

Electronic Funds Transfer (EFT): The electronic exchange (transfer of money from one bank account to another), either within a single financial institution or across multiple institutions, through computer-based systems. Wire transfers and ACH payments are examples of EFTs.

Wire requests: A Purchase order will include all required information necessary to complete the wire.

Wire transfer: An electronic transfer of funds from one bank account to another initiated directly with the payer's bank.

Policy Statement:

A wire transfer of funds in payment of an obligation of the City of Vineland (City) will only be used when the situation requires immediate good funds to settle a transaction. If a more inexpensive mechanism can be utilized to effect payment of the obligation (i.e. ACH or paper check), which is true for most domestic payments, the Chief Financial Officer (CFO) or their designee shall reserve the right to effect payment with a more inexpensive mechanism.

All other policies and procedures in relation to the purchase of goods and/or services must be adhered to.

General Requirements: All EFT payments will be coordinated and submitted through the Finance Department's Accounts Payable unit. The CFO or his/her designee will approve all new and changes to electronic funds transfer requests, ensuring that the payment via wire is necessary, all required documentation is provided and appropriately approved, and that the request and banking account information is accurate and valid.

Roles and Responsibilities

Accounts Payable in the Finance office is responsible for ensuring that proper documentation, authorization and accounting information are provided and accompany any EFT payment instructions.

Purchasing Department – Qualified Purchasing Agent (QPA) is responsible for administrative process for the purchase of goods and/or services and negotiating payment terms in relation to those purchases. If payment via EFT is requested, the QPA is responsible for working with the CFO to ensure the payment can be made in accordance with this policy.

The Finance Office – Account Payable Unit is responsible for initiating releasing EFTs on behalf of the City. Two separate individuals are required to initiate and release EFT payments through the City's banking partner's computer-based system. The CFO or their designee also has the responsibility to confirm EFT instructions with specific departments and individuals if there is any question as to the validity of the EFT request.

Other Departments - are responsible for obtaining and submitting proper support and approvals, including the completed Purchase order to the CFO at least seven business days prior to payment being needed.

Procedures

To promote the safety of City's funds in the EFT environment, the following procedures will be adhered to by all City employees requesting payments via EFT and all City employees involved in processing payments via EFT:

1. The procedure to initiate an EFT is subject to the same financial policies, procedures and controls that govern disbursement by any other payment mechanism.
2. EFT transactions will not be made without proper authorization of affected parties in accordance with federal and state statute and accepted business practices.
3. Authentication of new EFT requests and changes to existing EFTs required prior to the transaction being input into the computer-based banking system and includes the following steps:
 - a. **Validate** all new electronic payment instruction requests received even if the request is internal.
 - b. **Contact** the supplier or requester directly by phone to confirm any requests for payment method or payment instruction changes. Do not use the contact information provided on the request to change payment method or payment instructions; do use contact information known to be genuine such as the contact information in your master supplier file or information collected from the original contract. Have the contact confirm existing payment instructions on file prior to making changes to those instructions (i.e. current bank account and routing number provided in original instructions).

- c. **Verify** the new information provided on the payment instructions provided with the known contact (i.e. contact bank to confirm correct account name, number and routing information).
 - d. **Document** the verification process that was followed to validate payment instructions. The person responsible for entering/updating wire instructions and the person approving new/updated wire instructions must approve the record of verification. A record of the verification must be maintained in accordance with record retention policies.
4. When wire payments are approved, they will be set up as a template in the computer-based banking system and cannot be altered by those assigned to use it.
5. When ACH payments are approved, they will be set-up in the vendor master database in the financial accounting system by individuals authorized to perform vendor maintenance.
6. Bank balances will be monitored daily for unusual or unexpected transactions. This is achieved through notices from the bank on a daily basis and monitored in the Finance office by Cash Managers responsible for the management of cash.
7. Reconciliation of banking activity to the general ledger will be accomplished in a timely manner with investigation and resolution of reconciling items.

FUND BALANCE POLICY

The objectives of this policy are to; provide working capital for the City of Vineland to meet cash flow needs during the year; and to fund one-time, emergency, unanticipated expenditure requirements or revenue shortfalls, to ensure a stable tax rate, and to preserve the credit worthiness of the City of Vineland.

To achieve the objectives of this policy, the following guidelines shall be adhered to:

Establish a target range for the end-of-year available Fund Balances as a percentage of operating expenditures for the upcoming fiscal year of the City of Vineland. This may include the Current Fund, any Capital Improvement Funds, and any special reserves which may be appropriated without the requirement of reconstituting, except as delineated within this Policy.

Available fund balances serve as a cushion against potential revenue shortfalls and expenditure overruns. In funding a project the City can decide to use fund balance or issue bonds. The decision as to whether to bond for the full cost of a project or to pay for part of the project with available fund balance must be made at the same time. Therefore, a fund balance target should be established along with guidelines for debt affordability. The maintenance of certain levels of fund balance is not to be construed as surpluses or over taxation by the City. Fund Balance is an essential element of sound fiscal management required to sustain a high credit rating, provide financial management flexibility and ensure availability of funds to address unanticipated financial requirements.

WHEREAS, the maintenance of fiscal stability is a particularly important to the prudent operation of government and in determining its creditworthiness; and

WHEREAS, the ability to adjust local government revenues during the budget year and from year to year may be limited to meet unanticipated expenditures resulting from, inter alia, natural disasters, unforeseen increases in operating costs, unexpected capital expenditures; and

WHEREAS, changes in federal and state government spending policies can also impact local government revenues, particularly if reductions in such spending force local governments to increase their own spending to make up for the loss in federal and state government revenue; and

WHEREAS, unassigned fund balance, represents an available resource that can be used to meet working capital requirements, emergency expenditures and afford transition due to systemic changes in revenues and expenditures; and

WHEREAS, sufficient levels of unassigned fund balance can assure the continued orderly operation of government and the provision of services to taxpayers and the stability of the tax structure; and

WHEREAS, local governments frequently utilize a percentage of the municipality's annual operating expenditures as the means of determining the appropriate level of an unassigned fund balance; and

WHEREAS, maintaining the stability of sufficient levels of unassigned fund balance will be equally important for the City of Vineland, so that the City of Vineland's Fund Balance Policy will be meaningful and effective;

Accumulating or rebuilding Fund Balance

If the year-end Fund Balance, based upon estimates of the CFO or unaudited figures, is for any reason below the stated minimum deemed prudent, then, it shall be no more than the following:

1. Maintain minimum unassigned General Fund balance of 4% to 6% of the previous year's audited operating expenditures, with a goal to achieve a minimum of one month of the ensuing year's budgeted General Fund expenditures.

2. As part of the annual budget process, the CFO will estimate the surplus or deficit for the current year for all funds and prepare a projection of the year-end unassigned General Fund balance. Any anticipated balance in excess of the minimum unassigned General Fund balance may be budgeted to accomplish the following goals:

- a. Fund reserves
- b. Capital assets with a useful life of (5) five years or more
- c. Provide direct tax rate relief

3. Withdrawal of any amount of unassigned Current Fund balance in excess of the targeted minimum of the amount budgeted under (2) above, for the sole purpose of reducing the ensuing year's property tax levy, may be made only upon a specific vote of the governing body.

4. The Governing body, by vote, can declare a fiscal emergency and withdraw any amount of Current Fund balance for purposes of addressing the fiscal emergency. Any such action must also provide a plan to restore unassigned Current Fund balance to the minimum balance within a (5) five-year period.

5. This policy will be reviewed by the Budget Committee every three years following adoption or sooner at the direction of the governing body.

"The unassigned fund balance shall consist of at minimum 100% of cash surplus or 8% of budgeted expenditures, whichever is less; until which time the unassigned fund balance is an amount equal to not more than 12% of annual operating expenditures."
